

AUTO SPRINK

THE VISION TO HARNESS THE FUTURE OF TECHNOLOGY NOW!

To increase performance of your Nvidia graphics card, right click on your desktop and open your Nvidia Control Panel.

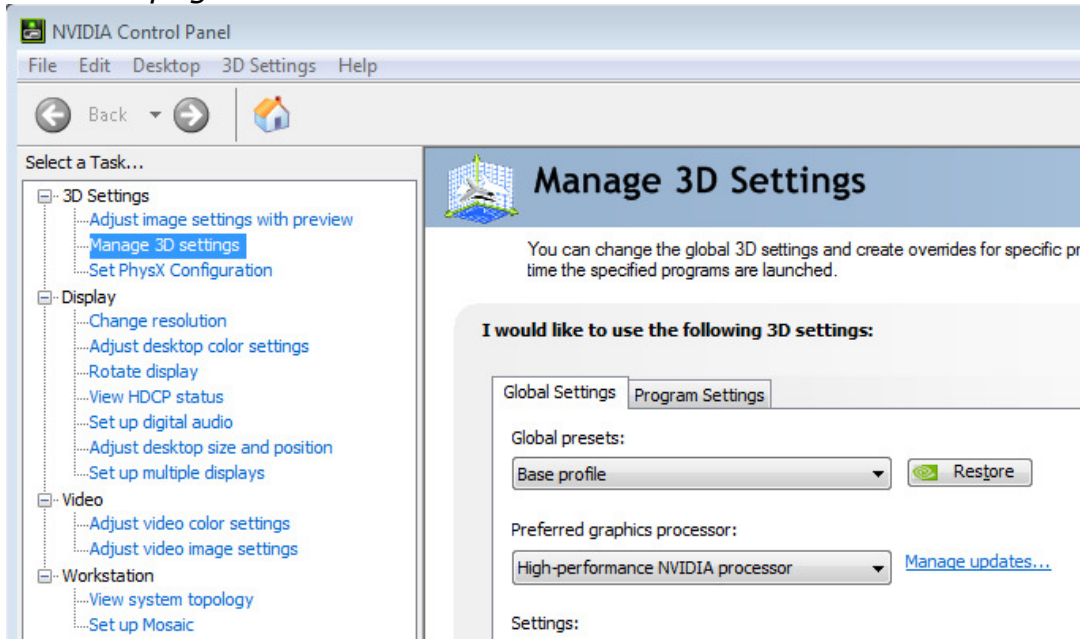

In the left frame, click **"Adjust image settings with preview"** then click **"Use the advanced 3D image settings"** then **"Take me there."**

If you see the option for **Preferred graphics processor:** change it to **High-performance NVIDIA processor***. Click **Apply** at the **bottom of the screen** and close the **NVIDIA Control Panel**.

**If you don't have the Preferred graphics processor option, continue to the next page.*

If you don't have the option to select your preferred graphics processor. Click **"Adjust image settings with preview"** again and select **"Use my preference emphasizing:"** and drag the slider to **Performance**.
